

DISPOSITION REGISTER

Investigated issues and their status

Document	RTL-TRIAGE-REGISTER
Record date	2026-09-17
Entries	16
Classification	Internal working document. Not a verification sign-off.

1 Scope

This register lists every run directory holding a verdict record at the time of generation. It exists so that a reader can see what has been dispositioned, against which configuration, and with what status, without opening an individual report. Each entry has its own investigation report carrying the evidence; this register carries none.

2 Disposition vocabulary

Every entry in the register uses one of the following dispositions. The vocabulary is fixed, and a disposition outside it is reported as unrecorded rather than mapped onto a neighbouring term.

Disposition	Meaning
Bug confirmed	The reported behaviour was reproduced and is a defect in the design.
Bug confirmed, fix verified	The reported behaviour was reproduced, and the checks listed under Evidence pass against the corrected design.
Check passed	The checks that were run completed with the expected result.
Dead code, proven	The code cannot be reached in any state permitted by the stated model and assumptions, established by an unbounded proof.
Inconclusive	The investigation did not reach a disposition. Missing tools, parser errors, timeouts and unsupported inputs remain unresolved and are not converted to a successful result.
Not reproduced	The reported behaviour did not occur under the conditions investigated. This is not a statement that no defect exists.
Reachable, directed test supplied	The code is reachable, and a directed test that reaches it is supplied.
Waiver, with a stated software rule	The code is unreachable only while software obeys an explicitly stated rule. The rule is part of the disposition and is recorded in the Action section.

3 Agreement with an independent human record

Where a human record existed, the disposition reached without sight of it is compared afterwards. The comparison is recorded, not scored.

Agreement	Meaning
match	Same disposition as the independent human record.
mismatch	Contradicts the human record.
n/a	No independent human record was available for comparison.
partial	Overlaps the human record but disagrees on part of it.
supersedes	The human record stated no proof or test. This disposition agrees with everything the record did say and adds evidence.

4 Register

Issue	Core	Type	Disposition	Severity	Agreement	Evidence
1009	cv32e40p	Coverage hole referred for disposition	Waiver, with a stated software rule	Not assessed	match	3/4

Issue	Core	Type	Disposition	Severity	Agreement	Evidence
1010	cv32e40p	Coverage hole referred for disposition	Dead code, proven	Not assessed	match	4/5
1011	cv32e40p	Coverage hole referred for disposition	Dead code, proven	Not assessed	match	6/6
1012	cv32e40p	Coverage hole referred for disposition	Dead code, proven	Not assessed	match	5/6
1015	cv32e40p	Coverage hole referred for disposition	Dead code, proven	Not assessed	match	3/5
1004	cv32e40p	Coverage hole referred for disposition	Reachable, directed test supplied	Not assessed	supersedes	5/6
1005	cv32e40p	Coverage hole referred for disposition	Waiver, with a stated software rule	Not assessed	match	7/9
1006	cv32e40p	Coverage hole referred for disposition	Waiver, with a stated software rule	Not assessed	match	8/10
1007	cv32e40p	Coverage hole referred for disposition	Dead code, proven	Not assessed	match	2/3
196	cv32e40x	Bug report from an integrator or user	Bug confirmed, fix verified	Not assessed	match	5/6
198	cv32e40x	Bug report from an integrator or user	Bug confirmed, fix verified	Not assessed	match	5/6
323	cv32e40x	Bug report from an integrator or user	Bug confirmed, fix verified	Not assessed	match	4/6
333	cv32e40x	Bug report from an integrator or user	Bug confirmed, fix verified	Not assessed	match	2/6
410	cv32e40x	Bug report from an integrator or user	Bug confirmed, fix verified	Not assessed	match	4/6
558	cv32e40x	Bug report from an integrator or user	Bug confirmed, fix verified	Not assessed	match	3/5
993	cv32e40x	Bug report from an integrator or user	Not reproduced	Not assessed	n/a	3/5

Evidence column: artefacts present on disk over artefacts cited, checked when this register was generated. Artefacts deliberately not retained under repository policy, such as waveform dumps, account for the remainder unless a count of genuinely absent files is shown in brackets.

5 Reading this register

- A disposition here is an agent investigation record and requires engineering review. The register is not a sign-off and not a release gate.
- Each row applies only to the core and configuration named in its own report. A different configuration needs a separate run.
- Severity is reported as not assessed unless it was recorded. It is never inferred from the disposition.
- Agreement is a comparison against a human record made after the fact. Where no record existed it is reported as n/a, not as a pass.
